

Advance Excel Assignment 1

1. What do you mean by cells in an excel sheet?

Ans : Cells are the boxes you see in the grid of an Excel worksheet, like this one. Each cell is identified on a worksheet by its reference, the column letter and row number that intersect at the cell's location

2. How can you restrict someone from copying a cell from your worksheet?

Ans: On the Review tab, click Protect Sheet. In the Allow all users of this worksheet to list, select the elements you want people to be able to change. Move the pointer to cells for which the Locked box is checked on the Protection tab of the Format Cells dialog box

3. How to move or copy the worksheet into another workbook?

Ans : Click the sheet that you want to copy to the other workbook. On the Edit menu, click Sheet > Move or Copy Sheet. On the To book menu, click the workbook that you want to move the sheet to. Tip: To create a new workbook that contains the moved sheet, click new book

4. Which key is used as a shortcut for opening a new window document?

Ans : Ctrl+N

5. What are the things that we can notice after opening the excel interface?

Ans : From the Excel Start Screen, locate and select Blank workbook to access the Excel interface.

6. When to use a relative cell reference in excel?

Ans: By default, a cell reference is a relative reference, which means that the reference is relative to the location of the cell. If, for example, you refer to cell A2

from cell C2, you are actually referring to a cell that is two columns to the left (C minus A)—in the same row (2)
